

Type: InceptionTitle: AdjutantStatus: ONRI: E1

Context: A reoccurring frustration is a modern solution to locating all sources that require changes to updated personal information, such as addresses, bank details, and phone numbers. The initial feature of this service is to fulfill just that, with a potential following of merging various problems and their respective solutions. Inspired by the terran adjutant from the franchise **StarCraft**.

**Core Decision:** Implement an accessible label collection of personal details to help facilitate retroactive changes in sites, apps, and other services that require them.

Prospects	Decision Parameters	OTD Concerns
<div>1. Establish interface for creating a collection of labels<ul style="list-style-type: none"><li>— Holds personalized details that suggests (recommened) or mirrors (ill-advised) personal data</li></ul></div> <div>2. Link details to sites, apps, and services that depend on them</div> <div>3. Initialize collapsed version of interface<ul style="list-style-type: none"><li>— Indexing features</li><li>— Iterate over services on particular labels</li></ul></div> <div>4. Convenient redirects to respective services</div>
